

Final Report WoRMS-LifeWatch data grant 2015

Taxonomic group: Order Isopoda, Suborder Oniscidea

Name of the responsible editor: Stefano Taiti

Name of who has done the work: Stefano Taiti

The basionym of all the accepted and unaccepted families, genera and species of Oniscidea have been checked and the numerous mistakes in spellings and authorships have been corrected.

Ca. 500 species (accepted and unaccepted) that were missing have been added.

The distributions for all the over 3800 accepted species have been added.

The total number of taxa examined and corrected or added is ca. 7000.

For each taxon a reference to the most recent catalogue available (mainly the world catalogue by Schmalzfuss 2003) or to more recent publications for taxa described after 2004 have been added.

The Oniscidea in WoRMS are now updated to species level up to September 2016 .

Florence, 14 Oct. 2016
