Following publication of the original article, the ZooBank (online registration system for the ICZN) LSID (Life Science Identifier) registration number was missing.

All of these articles were published since 2020 fully Open Access and thus “online-only” (no more printed versions). For this reason, as per ICZN guidelines, the nomenclatural acts in these articles should have been registered in Zoobank prior to publication and the Zoobank LSID-numbers included in the final online publications in order to validate these nomenclatural acts.

All articles have now been registered in Zoobank and the missing ZooBank LSID numbers are available via this

Correction article. Furthermore, the original articles have all been updated with the LSID numbers.

Zoobank and ICZN have confirmed that all of these nomenclatural acts are now with this procedure considered as valid.

The Zoobank LSID-numbers can be resolved and the associated information viewed through any standard web browser by appending the LSID number to the prefix “<http://zoobank.org/>”.

The missing ZooBank LSID are available via this Correction article and the original article (Swiss Journal of Palaeontology, 2020) has been updated.
