

The following species are of doubtful position:

*E. similis* ALLGÉN 1929e and *E. parapropinquus* ALLGÉN 1949d are most probably synonymous with *E. vulgaris*

*E. conicaudatus* ALLGÉN 1929e. *E. strandi* ALLGÉN 1940b.

*E. disasteri* ALLGÉN 1951f, most probably does not belong to *Enoplolaimus*.

*Enoplus filiformis* ALLGÉN 1935a, on the other hand, may belong to *Enoplolaimus*.
