

Theristus

flevensis Stekhoven 1935 p 141 pro "Monhystera velox" sensu De Man 1922; even if not quite correct from the nomenclatural point of view, we prefer this interpretation, neglecting a question mark in Stekhoven 1935 p 81 (? identical with "Monhystera velox" sensu De Man 1922) and following Stekhoven 1936 p 81 (if "Monhystera velox" sensu De Man 1922 should not be identical with Monhytera velox Bastian 1865, then it should be named Theristus flevensis); see Gerlach 1951 p 393
