

Bathypontia

Parapontellidae - Calanoida

G.O. Sars, 1905.

(M)
B. elongata.

Syn. Bathypontia Sars, 1905^b, p. 23.

Body elongate: anterior division like ~~antenna~~
and almost cylindrical. Head with a small
and simple rostrum: last segt. of metasome
with its lateral lobes bilobed: tail slender
 $\frac{1}{3}$ the length of the anterior division and 4-
jointed. 1^o antennae 25-jointed, scarcely
exceeding the length of the carapace: exopod
of 2^o maxillae 8-jointed - Mandibles with
the chewing blade stoutly toothed.
Endopod of 11^o legs 2-jointed, of 3 following
pairs 3-jointed: 5^o pair simple, 3-jointed.

Bathypontiidae: Calanoida
