

Harpacticidae - Harpacticoida.

Camptonyx = synonym -
Lilljeborg, 1875.

Syn. Camptonyx Lilljeborg, 1875, p. 9.
Camptonyx Giesbrecht, 1892, p. 821.
not Camptonyx Bensdorf, Mollusks, 1858

Changed to Campella Wilson, 1924, p. 14.

Body cylindrical: trunk and tail not well segmented. First antennae about 8-jointed, strongly setose. Second antennae with 2-jointed appendage - Mandibular palp 2-jointed, one accessory ramus. Maxillae subcheliform, claw slender and weak. First to the fourth legs with exopod 3-jointed: two first pairs with endopod two-jointed; two last pairs with three-jointed endopod.

Fifth legs very rudimentary - a mere pointed tubercle.
