Heterorhabdidae - Calanoida -

Mesorhabdus

(M)

G. O. Sars, 1905.

M. annectens

Syn. Mesorhabdus, Sars, 1905b, p. 9

Intermediate between Heterorhabdus and
Disseta, differing from the former in the
structure of the mandibles, and from the
latter in the structure of the anterior
myxids, all of whose lobes are well-de-
veloped and armed with setae, only
two of which are transformed into claw-
like spines.

Mesorhabdus Sars, 1905
