

Schisturus = synonym.

Lernaeopodoida
Lernaeopodidae.

Rudolphi, 1809

S. paradoxus.

This genus was proposed by Rudolphi 1809, Part 1, p. 8. for the single species mentioned above - Oken, 1815, p. 182, broadened the genus by the addition of several species before classed under Lernaea, viz. unclvatus & clavatus ^{+ others} & he gave S. paradoxus as the new name of S. molae. The genus, therefore,

as established by Oken becomes
a ^{partial} synonym of Clavella of the same
author, and includes many other genera.
On p. 358 Oken limited the genus Schisturus
by establishing for S. uncinatus the new
genus Clavella & including in it also
S. clavatus.

The name Schisturus was also used in
1809 for a worm genus by Rudolphi

Schisturus.

Proposed by Rudolphi in 1809 for the single species paradoxus: enlarged by Oken in 1815-6, who gave it the type species S. pectoralis (= Tepeophtheirus p.) and included also all the species which follow this card - The name had already been used in the same year (1809) for a worm genus, and therefore cannot stand,
